

WEIGHT AND DISEASE

Professor Constantine Tsigos, chairman of the 14th European Congress on Obesity, declared, "Excessive weight is not an aesthetic problem. It is a very complex problem tightly connected to diabetes, atherosclerosis (blocked arteries), osteoarthritis and other major health problems and causes of death. It must be treated like a disease."

MEDICAL COSTS OF OBESITY

Researchers have shown that treating obesity-related disorders cost as much or more than treating illnesses caused by aging, smoking and problem drinkers. Americans spend more than \$33 billion a year on weight-loss products and services; however, the economic cost of obesity in the United States was about \$117 billion in 2000.

NOT JUST ADULTS

Research studies show that 15% of the youth from ages 6 to 19, and 10% of the children from 2 to 5 years of age, are considered seriously overweight. According to Professor Tsigos' statement, these youth are poised for serious health difficulties in the future.

WHY WE GAIN UNWANTED WEIGHT

If we are to control our body fat and restore our health, our body's living cells must be provided with specific, vital nutrients. This is especially important with respect to the cells of the liver and endocrine system. The liver and endocrine system perform important metabolic functions that aid in controlling excess weight and surplus body fat, as they are responsible for removing toxic substances harmful to the body. If these vital organs are starved for essential nutrients through improper diet or nutrition, they can begin to function erratically. Unable to effectively neutralize all harmful toxins, the body creates more fat cells to store the toxic overload. This is why we gain unwanted weight!! Obesity goes hand in hand with liver and fat toxicity.

RESTORE HEALTH AND LOSE WEIGHT NATURALLY

Utilizing a unique, Intra Oral Spray delivery system, artisan® superior shape formulas are scientifically engineered to deliver the specific nutrients needed to revitalize the liver and endocrine system (the endocrine system includes the pancreas, hypothalamus, pituitary, thyroid, parathyroid, adrenals, pineal body, and the reproductive glands). Once restored to good health, these organs and glands help the body rapidly neutralize, dissolve, and then eliminate toxic

fat cells. This process of purification and cleansing greatly improves health, boosts energy levels, and helps the body to reduce toxic fat storage that has collected over the years.

WHY SPRAYS?

SOLUTIONS IE® Intra-Oral Sprays are easily and rapidly absorbed in the mouth, instantly delivering vital nutrients into your blood stream to where they're most needed: your living cells. This unique plasma-to-plasma nutrient delivery system bypasses the digestive process and leaves no residual toxins.

As you can see from the chart below, pills and capsules are much less effective than sprays in delivering essential nutrients to the cells of the body (comparative data provided courtesy of the Physicians Desk Reference).
