## Promotes

- ✓ Reduced Body Fat
- ✓ Increased metabolism
- ✓ Increased Energy
- ✓ Improved joint function
- ✓ Enhanced skin, hair and nail appearance

SOLUTIONS IE® proudly presents artisan® AminoZyme® as our newest addition to the artisan® Complete set of formulas. Successfully used by medical professionals for decades, artisan® AminoZyme superbly delivers collagen supporting amino acids in just the right form to be readily usable by your body to rebuild lean body mass. Artisan® AminoZyme can be used to support weight loss, to enhance energy, to improve joint function, and to promote youthful skin and hair. Although artisan® AminoZyme can be used as a stand-alone product, it is most effective when combined with other artisan® Complete formulas.

## Essential Proteins

Protein is an essential component of life, just like the oxygen we breathe and the water we drink. In fact, even the word “protein” is derived from the Greek word meaning “of first importance.”

The most important and abundant protein in your body is collagen. Collagen provides structure and firmness to body tissues, and is the fundamental building block of your eyes, brain, heart, lungs, skin, and the muscles and joints that keep you in motion. Collagen is the protein of life!

## What is Collagen?

Collagen is a naturally occurring group of proteins found in your body. In fact more than one third of the body’s protein is collagen. As the “glue” that holds your body’s connective tissue together, it provides vital structural support for bones, skin, tendons, ligaments, the heart and blood vessels, the digestive tract and other organs of the body. Collagen is why broken bones regenerate and wounds heal. With reduced amounts of collagen, your body tissues become less firm and resilient, your skin becomes wrinkled and loose, you become susceptible to the effects of wear and injury, and you are more at risk to develop debilitating diseases such as osteoarthritis or glaucoma.

As aging occurs, natural changes in your cellular proteins keep them from generating those amino acids essential to the production of collagen. Over time, these significant losses of collagen result in body tissues that are less firm, leading to sagging skin, wrinkles and other noticeable signs of aging.

## A Proven Formula

With four U.S. Patents, and used by over 3,800 physicians and hospitals for over 28 years, artisan® AminoZyme is a great source

of over 18 essential amino acids, which help the body to make new collagen. Taken as a liquid at bedtime during your body’s most productive period of rest and repair, artisan® AminoZyme’s collagen-producing nutrients are easily and rapidly absorbed by your body, helping you to look and feel younger, giving you more energy and stamina, and helping you to maintain a firm, lean physique. As a supplement to proper diet and nutrition, artisan® AminoZyme also provides great support during weight loss and body building programs.

Superior to other products which boost collagen production, artisan® AminoZyme’s liquid formula contains high ratios of Glycine, Proline, Hydroxyproline and Arginine, the four essential amino acids that help you maintain a lean, firm body mass and youthful appearance. Taken at bedtime, artisan® AminoZyme contains no harmful stimulants and chemicals and it tastes great! With regular use, artisan® AminoZyme will help your body to restore healthy collagen levels, leading to soft and more elastic skin, sturdy bone, joint and connective tissue, strong nails, and luxurious hair. artisan® AminoZyme will even help you to get a better night’s sleep!

## Use with artisan® I and II

The benefit of artisan® AminoZyme is greatly enhanced when used in conjunction with both our Artisan® I and II products.

## A Leaner, More Firm Body

A lean, firm body means lots of muscle tissue. Muscles, not fat, consume a large portion of each day’s calorie intake. The more lean body tissue you have, the more calories you’ll need each day to maintain your weight. Unfortunately, with dieting alone, as much as 40% of the weight lost is lean body mass. Through fad diets and lack of exercise, our bodies become thinner, but are weaker, and surprisingly, burn fewer calories. That’s why so many fad diets fail over time.

Supplementing proper diet and exercise, artisan® AminoZyme helps your body to maintain lean body mass, improving strength while helping you to burn calories. Improved collagen levels also help promote healthy hair, skin and nails.

## How to Take artisan® AminoZyme

It is important to take one tablespoonful of artisan® AminoZyme with a glass of water at bedtime on an empty stomach. If possible, don’t eat three hours prior to going to bed. This allows the key amino acids and peptides in artisan® AminoZyme to be readily absorbed into the bloodstream and effectively used while your body is in its anabolic or rebuilding mode. To provide quick energy and to maintain more consistent blood sugar levels, a tablespoon of artisan® AminoZyme can also be taken mid-morning, between breakfast and lunch, or mid-afternoon, between lunch and dinner.
